CINCINNATI PRESSES

220 TON (US) CINCINNATI P/M COMPACTING PRESS
(SEE MORE INSIDE BROCHURE)

This fast set-up Cincinnati compacting press Model 220-DC-6 with 220 ton (200 metric) pressing and 100 ton (90 metric) ejection force and 3-platen die module is complete as removed from a high precision P/M parts manufacturer in USA. With 6" die fill (152 MM) and floating die, this is a very versatile press rated for 10-30 parts per minute. Mohr can ship to any location worldwide.

DREVER

WIRE MESH BELT SINTERING FURNACE

This powder metal sintering furnace with 24" wide wire belt manufactured by Drever with a maximum temperature of 2100°F is gas fired and has rapid burn off and air cooled carbon correction zone. It is now removed from service, is priced favorably for the buyer and is complete for use elsewhere. Inspection can be made in IL in the USA.

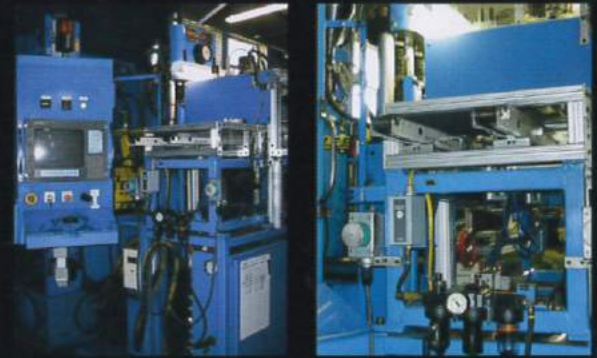

POWDER METAL PRESSES

HYDRAMET MODEL HC-12C

POWDER COMPACTING PRESS

This late model Hydramet 12 ton automatic press was recently removed from service where it was pressing precision tungsten carbide/hardmetal inserts for the mining tool and other industries. The press is offered complete with the previously used automated part removal and stacking machinery that was acquired as an accessory for automation and at a very low price for immediate sale. It is ideally suited for sale to a hardmetal or technical ceramic manufacturer in India or elsewhere in or near Asia since installation was close geographically.

HYDRAMET MODEL HC-80XL

POWDER COMPACTING PRESS

Hydramet 80 ton Powder Compacting Press Model HC-80XL with withdrawal tool motion (floating die) for opposed ram pressing. Formerly used for pressing precision tungsten carbide/hardmetal compacts it is used widely in the technical ceramic and abrasive industries as well. This press is complete in CA in the USA.

DORST POWDER COMPACTING PRESSES

30 TON
MODEL TPA-30

40 TON
MODEL TPA-40

100 TON
MODEL TPA-100

180 TON
MODEL TPA-180

BUSSMANN 100 & 200 TON POWDER PRESSES

The 200 ton was fully rebuilt and updated recently. Very versatile presses and fully hydraulic.

Go to www.mohrcorp.com and use "BUSSMANN" as search word or go to Special Projects for Full Description

GASBARRE 100 TON SIZING/COINING PRESS

ONLY FOUR YEARS OLD. OFFERED AT A FRACTION OF NEW PRICE.

Mohr Corporation offers one pre-owned 100 ton Gasbarre sizing press manufactured in 2005, Serial Number 20051293. 10" stroke, output speed adjustable from 10 to 60 strokes per minute; inch/continuous/single cycle control; automatic lubrication system; motorized upper ram adjustments; microprocessor based programmable limit switches.

STOKES 100 TON POWDER PRESS

LATEST STOKES MODEL: MODEL 900-280-7 (NEWER 280G PRESS)

S/N: T-66314 Complete with air brakes and much more. An outstanding P/M press and very inexpensive.

- MOVING DIE TABLE FOR TOP AND BOTTOM PRESSURE.
- MECHANICAL RELIABILITY AT HIGH SPEED.

CONTINUOUS VACUUM SINTERING AND BRAZING SYSTEM WITH DE-WAXING

ABAR-IPSEN Sintering System previously used to sinter engine cams for automotive cam shafts and braze them to the cam shafts. Three complete systems offered and installed in the USA.

These systems were installed for a high tech sintering process for automotive engine components. They have applications for many types of metals and P/M parts for automotive, truck and other engines or drive train components. These are advanced technology P/M sintering furnaces that can be purchased for a small fraction of the original purchase prices of recent years. All of the furnaces are complete and still installed. They are an excellent value for other applications such as continuous heat treating as well as P/M sintering.
